

Algidex Ag[®]+ Antimicrobial Wound Dressings

Algidex Ag[®]+ wound dressings are a unique combination of silver, alginate, and maltodextrin designed to support an optimal moist wound environment.

- Provides quick and sustained antimicrobial barrier against a broad spectrum of microbial organisms for up to seven days¹
- Safe for use on all ages
- Does not require activation or the use of sterile distilled water
- Up to seven day wear time limits frequent dressing changes
- Inhibits bacterial cell division which minimizes the development of resistance²
- Gentle, non-staining, and non-irritating

Algidex Ag[®]+ Dressing

vs.

Silver Sulfadiazine

¹ Broad spectrum represented in testing by the following microbial organisms: *Escherichia coli*, *Pseudomonas aeruginosa*, *Staphylococcus aureus*, methicillin-resistant *Staphylococcus aureus* (MRSA), and *Candida albicans*.
