

Multidex® Maltodextrin Wound Dressings

Multidex® wound dressings are a sterile maltodextrin composition with 1% ascorbic acid that supports an optimal wound healing environment across a variety of wound types. Available in gel or powder options. Multidex® Gel dressings are ideal for use on low to moderately exuding wounds. Multidex® Powder dressings are ideal for use in highly exuding wounds.

- Rapidly mixes with exudate within the wound to form a protective coating
- Maintains an ideal moisture balance to protect against dehydration
- For use on most wound types, including infected or hard-to-heal wounds
- Non-toxic and not systemically absorbed
- Helps control odor while decreasing exudate
- Penetrates all wound irregularities to fill tunneling and undermining
- Softens necrotic tissue to facilitate debridement

- Promoted wound healing in chronic venous leg ulcers¹
- Multidex mimics in vivo wound behavior related to TGFβ1, MMP-1, and TIMP-1 expressions
- Multidex increases gelatinase activity to promote collagen turnover

Proven Efficacy Multidex® Maltodextrin Wound Dressings Stimulate Wound Healing

- 73 wounds of various etiologies in a prospective case series²
 - 75% greater than 70 years of age
 - 90% had comorbidities documented to impair wound healing
- Excellent autolytic debridement observed with study dressing
 - Supports use in the debridement process to remove all types of necrotic tissue
- Observed overall improvement in chronic, difficult-to-heal wounds
